

## **Courses Of The Sun**

When I saw beside my toes the ending of a line  
That's drawn across the floor past the fridge and out the door  
I put on all my favorite clothes and I tied my laces tight  
Followed it still looking down across the street and out of town  
Till night fall when the stars are bright or are they satellites  
It started getting cold and now im thinking about getting old  
Living life by courses of the sun im not the only one  
That's missing out and wasting time entire days to follow lines

But it feels so good to come home to you

When I saw beside my nose the movement of a fly  
I wish I ahdn't know because now his buzzing wont leave me alone  
He's picking at my lunch and hoping when I lose my appetite  
I'll go about my day without a thought to throw the food away  
I let him eat for free so maybe he wont think to bother me  
But once I leave the room he starts to follow me his buzzing too  
Living life by courses of the sun im not the only one  
That's missing out and wasting time entire days avoiding flys

But it feels so good to come home to you

Whispering holding our hands out lets talk about  
Anythin at all while we reach for the walls  
Because I feel enclosed on all sides and it's too dark for my eyes  
With the lights off but you love the night time  
Whispering holding our hands out lets talk about  
News for the day and all the money we can save  
Because you feel enclosed on all sides  
And its to dark for my eyes with the lights off  
But you love the night time

We ask more to last for  
Every day till the end and then we do it again

But it feels so good to come home to you

## **Outside Walls**

You pass the outside walls and hope to swallow  
Your indecisions the first amusement parks to greet the spring  
You stay confined to all the concrete parks where children listen  
To you sit and dream about how diamonds sing

The fall is far but somehow  
It doesn't mean a thing to me now  
The fall is harder without  
Someone to lead for me out  
Out of the cold  
Out of the cold

You pass the bathroom stalls and hope that all of your  
Dirty little lists of needs will wash clean  
You kiss the spaces left the cracks the light can reach the best  
On the nights we know that this and you and this is me

The fall is far but somehow  
It doesn't mean a thing to me now  
The fall is harder without  
Someone to lead for me out  
The spring is all we see now  
All we need to feel complete now  
Someone to lead for me out of the cold

### **Seasonal Impression**

The temperature is dropping on everyone we know  
The deperature is dropping no matter where we go  
And it's the same as the last time we've seen it all before  
It's the same as the last time and we're not looking forwards  
We close our eyes and sleep

The holidays are stopping and everyones alone  
And now there's no time for shopping or visiting your home  
And it's the same as the last time we've seen it all before  
It's the same as the last time except now we're looking forwards  
To temperatures rising on everyone we know  
To temperatures rising no matter where we go  
And it's much better than the last time  
Evern better than before  
It's much better than the last time  
Because now we're looking forwards

We open our eyes for spring

### **Outlaws And Indians**

Outlaws and indians dispense their awful sense  
How far can the wish send, the back bend, the open end  
And it comes from off shore storms

It calls from far off horns

Outlaws and indians hold hands with their new friends  
How far can the dissonance the severance fill the deep end  
And it comes from off shore storms  
It calls from far off horns  
And it's singing

The fever it comes but only for the poor ones  
The fever it runs and asks just to hold us  
But we've seen the worst, we've seen the worst of our  
Own cruel minds  
And we think its just fine

### **Compounds**

Paceing hows it going  
Hows it knowing all the names  
Of every place you want to go so far away  
Where the grass is growing  
And half the world has washed away, it's eroding more and more each day  
We wait for happy callers they're laughing  
And trapping what we need around it makes us feel okay about  
The lows we know the sadness shows  
We know that opening  
Is never to out of the way  
Is closer closer every day  
We wait our past knows  
There's hands on our throats  
We're waving past boats  
And wadeing our toes  
In limbo

Compounds shapes the wall sounds  
Shapes are bouncing jumping hoops across the floor  
Till it makes sense to you  
And sunlight never works nights  
Never brightens us before we sleep  
Or hears the secrets that we keep to ourselves

### **Solid Feet**

Lay down on the south side  
Of a riverbank in the fall time  
Listening to the trees die  
At least we're not alone

Down the sidewalk when it's nighttime  
Hear the last screams of a couple fight  
With the past dreams of a young life  
At least we're not alone  
And will you ask me when the time's right  
Getting wuiet with the cold bite  
When you come home and there's no light  
Just to make it to the door  
Well it's my life and it's your life  
And it may not seem like much at times  
But we're still alive and every night  
We don't fall asleep alone  
Well we may not have our own home  
We may not sleep enough at night  
And we may once have a couple fight  
But at least we're not alone  
And we may not smile every day  
We may not keep the cold away  
We may not always look the same  
But we'll never be alone

Well I may not have a cent to lose  
And I may not have the best news  
But as long as I'm enough for you  
Then we'll never be alone  
Because you may no sober up clean  
And you may not have your solid feet  
But you'll always be more than enough for me  
And we'll never be alone  
Well we may not have our own home  
And we may not sleep enough at night  
We may twice have a couple fight  
But we'll never be alone  
And we may not smile everyday  
We may not keep the cold away  
We may not always look the same  
But we'll never be alone
